

## **Out of Bounds - Sports in the Inner City**

### ***About***

Noube Productions is one of the fastest growing production companies in New England, the focus of Noube Productions are documentaries that address social issues. Noube Productions has produced three consecutive award winning documentaries gaining national attention. Previous documentaries have received first place honors from the Urban Suburban Film Festival in Philadelphia, Action on Film Festival in California, and Roxbury Film Festival in Boston. Past documentaries shed light on controversial issues such as fatherhood, drug addiction, and guns.

Our goal is to raise 10,000 dollars to cover initial equipment cost. Noube Productions is asking for an investment of full, half, or even partial. With the continuing change in technology Noube Productions is in need of upgrades to continue to be a national player in the documentary market.

## ***Small Risk -High Return***

### ***Risks Are***

Any investment in film production involves a high degree of risk. This investment should not be made by anyone who cannot afford the loss of his or her investment. Before investments are made the following risks must be carefully considered:

- a) The success of any medium, whether film or TV, depends on the public's tastes and opinions at any given time. The likes and dislikes of the public vary greatly from day to day and can never be confirmed. As a result, it is almost impossible to determine the success of this, or any, film.
- b) The release of a similar film may affect the popularity of this film.
- c) As a result of the above factors, and others not listed here, only one of every five films made recoup their cost.

## ***High Return***

With a minimal donation of one thousand dollars, it will result in 5% of total distribution of **network contracts** upon completion of the film **within a five year window, this does not include online sales (amazon, hulu, iTunes, vimeo, etc).**

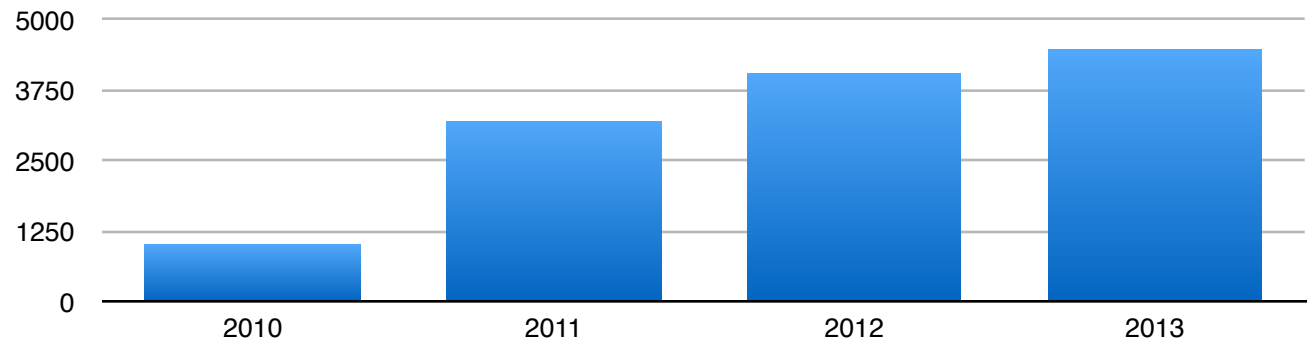

## ***Market Needs***

There is a need for educational films that deal with current issues that engage and capture the attention of younger audiences. In addition these films would also need to encapsulate the severity of the different topics and be able to engage the older generation as well, providing an exciting opportunity for documentarians.

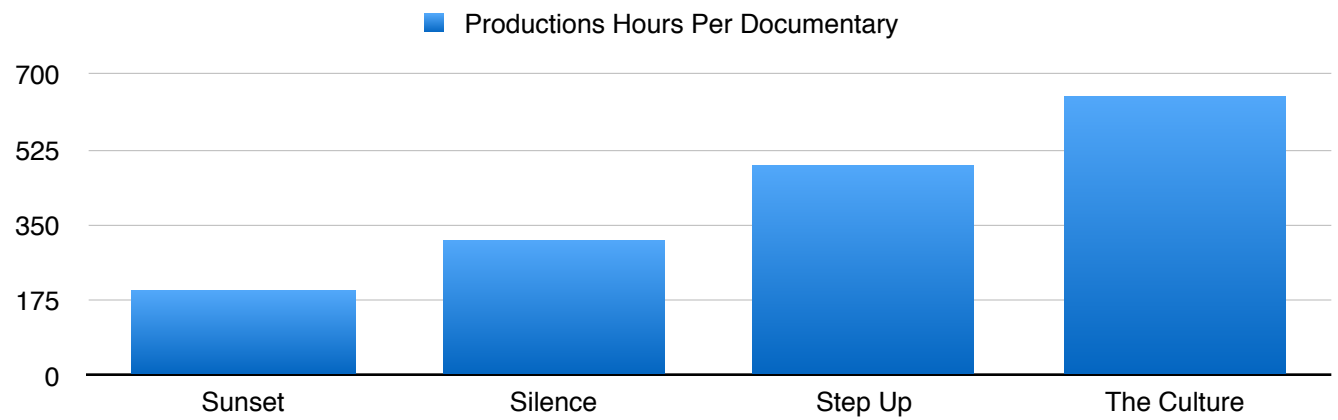

## ***Competition***

Documentaries are a unique part of the film industry. Less than 20% of all films released in 2013 are documentaries. This results in Noubé Productions having the opportunity to capitalize on an untapped industry. The competition in the documentary industry is very low as opposed to other genre of films. This leaves us in a powerful position to dominate.

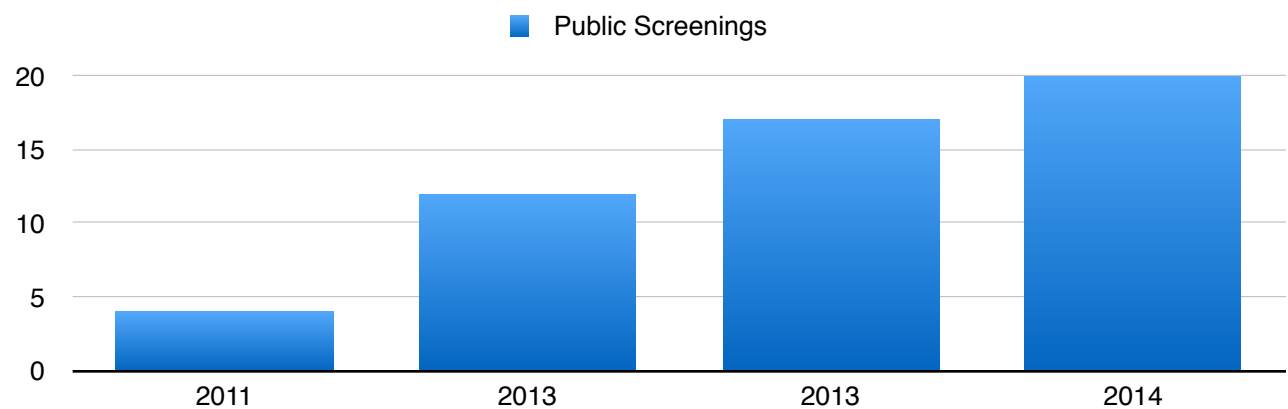

## *Revenue*

## *Production Hours*

## *Public Screenings*

## ***Additional Funding Plan***

The remaining cost will be the price of traveling and talent. Noube Productions is a two prong production company with one aspect focusing on fundraising, while the other division is focused on consumer service revenue.

- Examples:
- Weddings
- Concerts
- Music Videos
- Commercials

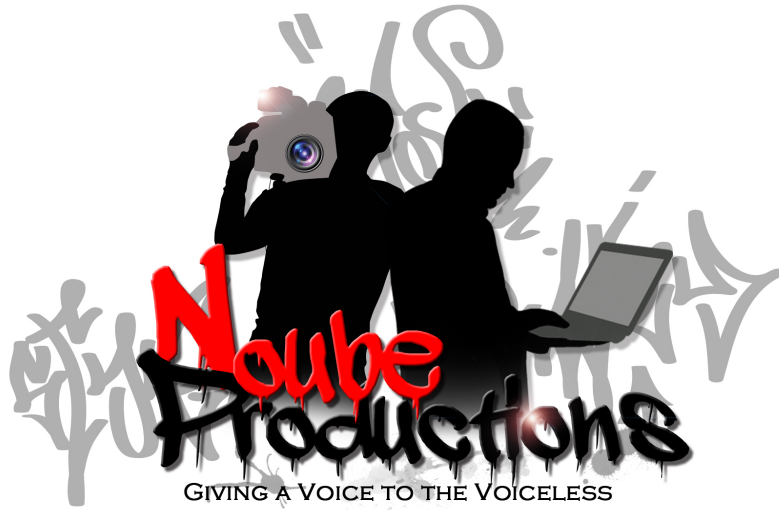

The funds generated from these clients go directly into funding current and future documentary films.

## Documentary Concept: ***Out of Bounds***

The next Noubé Production documentary will tackle the relationship between sports and the urban environment and how the connection has shaped the lives of many athletes. Often times in the inner city sports may be seen as the only option for success.

Our goal is to first understand the passion for sports in the inner city and the importance of having pride in local athletics. We will investigate the social, economic, and cultural reasons as to why local athletes may choose a different crossroad that may impact their lives in a negative or positive fashion. Interviews will include coaches, players, journalist, and celebrities on decisions and turns athletes made that impacted their lives going forward.

Many athletes come from a broken home and negative surroundings but become success stories, while others spiral into drugs, guns, and eventually prison. why? This documentary will be a national eye opener to the local and national sports scene and will be used as a educational tool.
